

WELCOME TO MOMENTUM CONNECTOR

This document provides basic Momentum Connector installation steps with useful configuration setting options for Skype for Business integrations.

INSTALLATION

- » Download the Momentum Connector PC Installer and follow all installation prompts. (Download [HERE.](#))
- » When the installation steps are complete and the user clicks **Finish**, a Connector client icon is automatically added to the Windows Tray Menu and the application opens to display the Telephony settings section of the *Configuration* view.
- » Choose the Philadelphia server platform.
- » Enter your Momentum subscriber credentials. (username format = [ph#]@completeuc.com) and click **Save** to connect and startup.

If you need password assistance, please contact the Momentum Support Team at (888) 538-3960

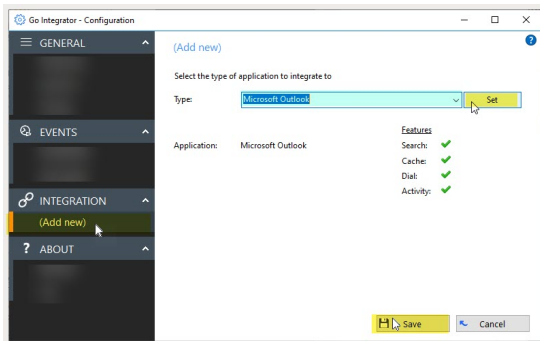

CONFIGURATION SETTINGS

The following are some powerful Configuration setting options to define when integrating with Skype for Business:

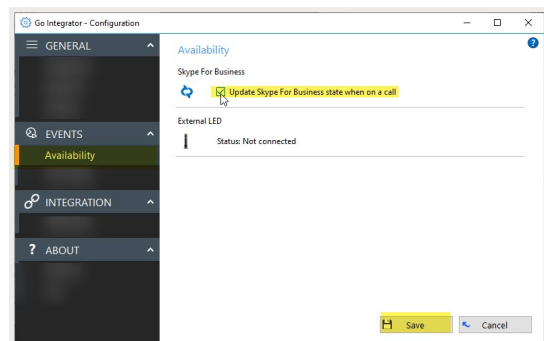

» Integrations:

Add New: Select **'Microsoft Outlook'**, **Set**, and **Save** to enable screen pop of outlook contacts during calls.
Option: Select **Google Contacts** for Non-CRM systems.

» Events:

Availability: Enable **Update Skype For Business state when on a call** to display presence information.

» Dialing:

Select the methods of dialing to use:

- Enable **Focus Dialing** to allow dialing from Broadsoft phone using the Skype *Click to Dial* action option.
- Open *Dialing Handlers* and enable **Call from Skype for Business** to use the *Call From Deskphone* action option when viewing contacts.
